

Prerequisites: All personnel undertaking this assessment must have previously completed the following;

- Read Pneumatic Hand Tools Risk Assessment, **Task ID. 35918** and associated Standard Operating Procedure, **SP-058**
- Read Compressed Shop Air UQ Risk Assessment **Task ID # 2128** and associated Standard Operating Procedure, **SP-028**.
- Complete local Workshop Induction.

Competency: Utilize Pneumatic Hand Tools within a workshop in accordance with occupational health and safety standards.

Operations: This assessment should take place in any EAIT Faculty Workshop equipped with Pneumatic Hand Tools. The assessor is required to assess all aspects of the competency regarding the following operations;

1. *Pre-operational checks,*
2. *Operation\Startup of equipment,*
3. *Housekeeping.*

Instructions: Each intended user of the equipment is required to complete an individual competency assessment, detailed in Section 1 below. Each element is to be assessed and the results recorded below. The actions used and evidence gained to assess competency (listed in Appendix A) are recorded against each criteria. Users are then required to answer the questions in Section 2 and then sign and date this document.

Notes:

Evidence of competency allows the user access to the equipment only for the tasks assessed. Proof of competency does not permit the assessment of untrained personnel's competency using this equipment. Only authorised persons are permitted to assess the competence of others in this process. Competent users will be required to be re-assessed on any related changes to the operating procedures of this equipment.

1. Operational Assessment

Element of competency	Performance criteria	Operation /Scenario	Self-assessment		Assessor review		Action/evidence (Refer to Appendix A)
			Competent	Not yet competent	Competent	Not yet competent	
Pre Operational Checks	Ensure that the Pneumatic Hand Tool is not tagged out of service.	1					
	The individual must be able to correctly identify, describe and set/adjust: Demonstrate that he/she is familiar with the Pneumatic Hand Tool controls:	1					
	Air lines:	1					
	Start/stop controls:	1					
Operation of Pneumatic Hand Tools	Select a suitable application to demonstrate the use of the particular pneumatic hand tool.	2					
	Start the equipment safely and demonstrate the correct method of using the equipment.	2					
Shut down Machine	Follows correct shut down and clean up.	3					

2. Review Questions

Answer the following questions in the spaces provided. If you have any questions please ask the assessor. You may refer to the Risk Assessment, Standard Operating Procedure (SOP) or your notes if required. Once complete, insert your name and details in the space provided and return the completed form to the assessor.

2.1 Name three potential hazards associated with using the Pneumatic Hand Tools?

1)

2)

3)

2.2 Do not operate the tool at a pressure above the manufacturer's rating. True or False?

2.3 Circle which safety equipment is mandatory when using Pneumatic Hand Tools.

1) Safety Glasses

2) Hi Visibility Clothing

3) Hearing Protection

4) Hard Hat

5) Safety Footwear

Authorisation

Appendix A

Possibilities for Action items		Possibilities for evidence	
A	Watch video	1	Direct observation of performance during work
B	Review procedures	2	Direct observation of performance during simulation
C	Attend central training	3	Return demonstration during training
D	Observe other staff	4	Completed end product, form or document
E	On the job training	5	Verbal assessment
F	Be mentored by person with these skills	6	Written assessment
G	Role play with other staff	7	>1 year Post-training trade experience
H	Online course	8	Other – Provide details
I	Technical trade training		
J	Other – Provide details
