

Girls in Computing

UQ's Girls in Computing event provides an opportunity for high school students to discover the exciting and endless career options available in technology, software engineering and computer science.

Inspiring Presentations

Student Sessions: Learn how you can shape the digital future with a career in computing.

Parent Sessions: Hear from industry leaders as they share their experiences and provide advice for you as a parent of the next tech generation.

Fun Hands-On Activities

Experience hands-on activities and virtual reality.

Information Booths

Discover your passion and talk to representatives from a number of student clubs and societies including Ladies in Technology, Design Society UQ and more!
