Managing Student Behaviours You Don’t Understand

EAIT Teaching and Learning Forum 2016

Have you ever:

- Had your class hijacked by a student?
- Struggled to manage challenging student behaviours in the classroom, laboratory, or your office?

Then this is the workshop for you!

As part of a Faculty T&L grant, EAIT is pleased to invite you to a workshop run by two world-renowned experts together to help you develop an understanding of some of the issues our students face, and to demonstrate appropriate behaviour management strategies.

In this workshop, you will be introduced to practical solutions to difficult situations allowing you to get the best from students you find challenging by asking simple questions such as:

- What can we do?
- How can we do it?
- Why should we do it?

ABOUT THE PRESENTERS

Adjunct Professor Tony Attwood is known internationally for sharing his knowledge of Asperger’s syndrome. He has an Honours degree in Psychology, a Master degree in Clinical Psychology, and a PhD (University of London).

Tony has designed this workshop to specifically answer your questions and to model responses based on his experience.

A/Prof Kate Sofronoff is a clinical psychologist in the School of Psychology UQ and a project leader with the Autism Cooperative Research Centre (ACRC).

Kate’s main area of research is in developing and evaluating programs to assist children, adolescents and adults with autism spectrum conditions.

Kate has been working with EAIT Faculty to develop resources for staff and students focusing on the management of student behaviour.

DATE: Wednesday 10th Feb 2016
TIME: 1.00pm-3.30pm
LOCATION: Terrace Room, Indooroopilly Golf Club
