Never before have technological changes been faster or more fundamental.

The digital age is creating countless new and exciting opportunities for people to help shape the future using technology. From tracking your health using wearable technology to accessing and managing your data in the Cloud, technology is at the core of our new, connected era.

At UQ, we are focused on equipping you with the skills and abilities to ensure you are prepared not just for your first job, but for a lifetime of success. So, whether you’re interested in becoming a video game designer building online worlds for the masses or a data scientist spotting trends across the health or legal industries, discover how your talents and passions can turn into an exciting and dynamic career in technology.
I like... My speciality I could be a...
