This one day event brings together experts from industry and academia to help leaders understand the core concepts and technologies, how these can be relevant to their organisations and industries, and how to navigate the organisational and legal implications.

The event includes seminar sessions, case studies and war stories, an interactive panel session and a facilitated workshop where participants can apply their learning as the first step to leading change within their organisations.

At the conclusion of the course, attendees will have an understanding of the relevance of blockchain and distributed ledgers to their business or industry, and skills to inform strategic decision-making.

This workshop will include:
- What is the Blockchain and why does it matter?
- Technical and cryptographic building blocks
- How does Bitcoin work?
- Smart contracts
- Case studies and war stories
- History of R3
- Estonia and their e-citizens
- AgriDigital and the supply chain
- Blockchain ecosystem/platforms
- Limitations, research and future directions
- Business outlook
- Why do we need Standards & Regulations
- ASIC/SCC watchdog
- Project failures.

Panel Session:
- David Hyland-Wood (ConsenSys)
- Dr. Adrian McCullagh (Odmob Lawyers)
- Lucas Cullen (Blockchain Australia)
- Katrina Donaghy (CivicLedger)
- A/Prof Marius Portmann (UQ, School of ITEE)
PRESENTERS

A/Prof Marius Portmann, University of Queensland.

Marius’ research interests include computer networks, cybersecurity and blockchain technology. He has been teaching blockchain technology at UQ for more than 5 years, and currently supervises 5 blockchain thesis projects, covering topics such as P2P networks for blockchain, private blockchains and payment systems.

Karina Honey, University of Queensland.

Karina is a PhD candidate in Business Information Systems at the University of Queensland (UQ) Business School. Her professional record includes over 15 years of project management & business analysis in New Zealand, Australia and Japan where she was involved in various organisational transformation programs. Her research interest lies in the field of Business Information Systems and she is currently undertaking her doctoral studies with a project that will provide a framework to determine if business projects are suitable distributed ledger technology (DLT) candidates (blockchain projects), with the correct capabilities, to have the best possibility of project implementation success.

Dr. Adrian McCullagh, ODMOB Lawyers

Adrian advises on Blockchain technology and its legal impact, and is also a member of Standards Australia’s Technical Committee on Blockchain.
