Interaction Design Exhibition

User experience design, or UX, is changing the way we connect with products, services and each other!

View interactive prototypes developed by UQ's Bachelor of Information Technology (User Experience Design) and Master of Interaction Design students from the course Physical Computing and Interaction Design Studio.

The ongoing theme for the exhibit is “Designing for playful and open-ended interactions in everyday life” – this year this theme has been realised by students through subthemes of social spaces, communicating across barriers, learning through play, reinforcing habits, playing with sound, enhanced homes and shared experiences.

Students explore human values such as social connection through the design of technology to be integrated into the everyday lives of a diverse range of people. Projects span internet of things, social computing and tangible interaction applications.

Don’t miss a great opportunity to see how future user experience design professionals bridge the gap between the physical and digital world!

When: Tuesday 28 May 2019
Where: The Edge, The State Library of Queensland
When: Two sessions will be held on the day. Please select the appropriate option when you register.

1. School students and large school groups
   School students and large school groups are invited to attend the exhibition between 12–4pm. If you would like to arrange a class booking, please email Helen Burdon at outreach@eait.uq.edu.au

2. General public
   The exhibition is open to the public from 5–7.30pm.
