Women in Engineering
Explore Day, Teacher Information

Provide your female students the opportunity to experience a day outside the classroom and to meet our current Student Leader role models.

We know that Teachers and Guidance Officers are key influences in students decision in their tertiary study choice. We also know that you cannot be, what you cannot see. WE Explore Day is a great opportunity for students to see engineering in a new light, that is inherently creative, outlining the unique and fundamental purpose engineers have in the world, by hands on activities and using inspiring female role models.

Join us for a day of hands-on workshops, inspiring sessions and a tour of The University of Queensland. Each high school can bring a maximum of 12 female students from Years 9 and 10. Spots fill up quickly so be sure to register online. Students can also register as an individual.

We have found our Annual Explore Day to be popular amongst attending students over the past six years. Post event survey from 2019 highlighted a 25% increase in attending female students considering engineering studies.

There will also be a Teacher Workshop on the day showcasing our new high school engagement activity and introducing some useful contacts for you in STEM.

Thursday 14th May 2020 - WE Explore Day at The University of Queensland, Saint Lucia. Meeting point is the Natural Amphitheatre (near Lakeside Cafe).
