Recording of this Presentation

Students, please be aware that this session is being recorded so it can be made available via the Faculty of EAIT orientation page. The reason we are recording the orientation presentation is to make it available for your future reference, and to support students who may not have been able to attend today’s session.

Suggested options for students not wishing to be recorded:

• Turn off video and mute audio
• Use a proxy name for Zoom (student attendance will still be on record with the Course Coordinator)

Please note that students are not permitted to record teaching without the explicit permission of the Course Co-ordinator. This includes recording classes using Zoom.

Some Tips

- Know which program you are in
- Check the requirements of your program
- Use the study plan

When you are developing your study plan, select courses you are interested in; and then for each course:

- Checking its availability; please note that some courses are NOT offered in every year
- Checking its prerequisites (particularly for structure courses); it’s students’ responsibility to make sure they have met all the prerequisites.
- Level 7 courses are generally most constrained ones.

- Research project is 1-year long; to help you perform better in your research project, you are encouraged to enrol in CIVL7505: Research Methods for Civil Engineers in your first semester.

- UQ has zero tolerance for academic misconduct (e.g., plagiarism)
