ECON1050

Students enrolled in BE/BEcon program

All BE/BEcon students are exempt from ECON1050 on the basis of compulsory Mathematics courses completed in the BE program.

When you receive exemption for ECON1050 you are required to complete another #2 course from the BEcon course list (other than courses in Group 1, or courses already used towards other BEcon requirements) in lieu of ECON1050.

All students enrolling in a BE dual degree program must meet with the first year engineering academic adviser before enrolling.

Contact: enquiries@eait.uq.edu.au to arrange an appointment.
