MGTS1201

Students enrolled in BE/BBusMan or BE/BCom programs

Students in the BE (Computer Systems) or BE (Software) majors who are enrolled in dual programs with BBusMan or BCom are required to complete the compulsory course INFS1200 towards the BE program. You will be eligible to receive exemption for MGTS1201 for the BBusMan or BCom.

Should you receive exemption for MGTS1201 you are required to complete another course from the elective component of the BEL Faculty program list in lieu of MGTS1201.

For all other BE majors you must complete MGTS1201 towards your BBusMan or BCom program.

All students enrolling in a BE dual degree program must meet with the first year engineering academic adviser before enrolling.
